Installation, Operation & Maintenance

Read and Follow All Safety Instructions. Save These Instructions.
These instructions generally describe the installation, operation and maintenance of the Hygeaire® Indirect Germicidal Ultraviolet Air Disinfection Fixture, Model LIND30-EVO. Questions that are not specifically answerable by these instructions should be directed to the factory.

Atlantic Ultraviolet Corporation® takes all possible precautions when packaging equipment to prevent damage. Carefully inspect and report all damages. Do not install damaged equipment. Follow all instructions on any labels or tags. Carefully inspect all packing materials before discarding to prevent the loss of accessories, mounting hardware, spare parts or instructions.

The information and recommendations contained in this publication are based upon data collected by the Atlantic Ultraviolet Corporation® and are believed to be correct. However, no guarantee or warranty of any kind, expressed or implied, is made with respect to the information contained herein. Specifications and information are subject to change without notice.
SAFETY WARNINGS

All personnel should be alerted to the potential hazards indicated by the product safety labeling on this unit.
The following conventions are used to indicate and classify precautions in this manual and on product safety labeling. Failure to observe precautions could result in injury to people or damage to property.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

DANGER
Danger indicates an IMMINENTLY hazardous situation, which, if not avoided, WILL result in death or serious injury.

WARNING
Warning indicates a POTENTIALLY hazardous situation, which, if not avoided, COULD result in death or serious injury.

CAUTION
Caution indicates a POTENTIALLY hazardous situation, which, if not avoided, MAY result in minor or moderate injury.

SAFETY INSTRUCTIONS

To guard against injury, basic safety precautions should be observed, including the following:

1. Read and follow ALL safety instructions.

Avoid exposure to direct or reflected germicidal ultraviolet rays. Germicidal ultraviolet rays are harmful to the eyes and skin.

2. Intended for indoor use only.
3. Do not alter design or construction.
4. Do not use this unit for other than its intended purpose, as described in this manual.
5. Do not mount under any source of moisture or condensation, such as humidifiers, cooling coils, etc.
6. Germicidal ultraviolet rays may break down plastic, rubber or other non-metallic materials, with inadequate resistance to ultraviolet. Shield all plastic, rubber or other non-metallic parts such as; plastic drain pans, wire insulation, flex ducts, humidifiers, filters, etc. which may be exposed to direct or reflected germicidal ultraviolet rays.
7. Do not remove any labels or devices.
8. Do not operate without proper electrical ground.
9. Do not operate the unit if there is visible or suspected damage to the unit or, if applicable, there is damage to power cord and/or plug.
10. Do not operate without lower panel secured.
11. Utility power supplied, to the unit, MUST match power requirements listed on the unit label.
12. Always disconnect power to the unit before performing any service or maintenance.
13. Read and follow all notices and warnings on the unit.
14. SAVE THESE INSTRUCTIONS.

SAFETY LABELS

DANGER
Danger Label: Hazardous Voltage and Ultraviolet Radiation (00-0199A1)

WARNING
Location of Danger Label

CAUTION
This symbol is used to identify the need to wear approved ultraviolet blocking eyewear.

This symbol is used to identify the need to wear approved ultraviolet blocking face shield.

This symbol is used to identify components which must not be disposed of in trash.
**PRODUCT APPLICATION**

**CONSTRUCTION**

The Hygeaire® brand fixtures are categorized as indirect type germicidal ultraviolet fixtures, which utilize STER-L-RAY® Germicidal Ultraviolet Lamp with a series of louvers to direct germicidal ultraviolet rays to the upper areas of a room, thereby destroying bacteria and viruses that are carried into the ultraviolet field by convection currents or air circulation.

Each Hygeaire® fixture is equipped with a Surelite™ Variable Output Ballast which enables on-site adjustment of ultraviolet output.

**PRINCIPLE OF OPERATION**

The Hygeaire® design has been carefully conceived to provide germicidal ultraviolet rays to disinfect the upper room air of occupied spaces in order to reduce the risk of cross infection and exposure of occupants to infectious airborne microbes.

The dosage, as it applies to ultraviolet disinfection, is a function of time, and the intensity, of ultraviolet radiation, to which the air is exposed. The exposure time, in seconds, is the total time it takes the air to move through the ultraviolet field, produced by the germicidal lamp. Exposure time is related to the airflow rate; the higher the airflow, the lower the exposure time or the lower the airflow, the higher the exposure time.

The operation of the Hygeaire® is as follows:

1. Ultraviolet rays project across the upper room air.
2. Bacteria and virus are destroyed that are carried into the ultraviolet field by convection currents or air circulation.
3. The air in the room is continuously being purified.

**LIMITATION OF USE**

Hygeaire® requires knowledgeable planning for; location, installation, and continued supervision to prevent exceeding the ultraviolet radiant exposure incident Threshold Limit Value (TLV) set by the American Conference of Governmental Industrial Hygienists. Currently the ultraviolet radiant exposure incident for unprotected skin or eyes should not exceed 0.2 microwatts per square centimeter (µW/cm²) at 254 nanometers (nm) for an eight (8) hour period.

Hygeaire® requires professional installation so all wiring complies with applicable local and national electrical codes. Installation is permanent, and relatively inflexible.

Safety and maintenance procedures MUST be implemented to prevent accidental exposure of personnel and other persons who might enter the irradiated space (Electricians and other trades people in particular). All work performed (painting, new ceilings, equipment or fixture installation, etc.) in the irradiated space must be monitored to ensure that they do not adversely impact the safety or effectiveness of the installation.

To monitor and test ultraviolet intensity, see “Zenith™ Ultraviolet Meter” in the “Optional Accessories” section.

**UNPACKING**

IN ORDER TO PERFORM THIS TASK, BE SURE TO WEAR THE FOLLOWING SAFETY EQUIPMENT: SAFETY GLASSES OR A FACE SHIELD, AS WELL AS GLOVES.

- Remove the Hygeaire® from its shipping carton.
- Atlantic Ultraviolet Corporation® takes all possible precautions when packaging this unit to prevent damage. Carefully inspect the unit, power cord and plug for damage and report all damage immediately. Do not assemble or operate if there is any damage, visible or suspected.
- Germicidal lamp is packed separately, to ensure maximum protection for the lamp. Keep the lamp aside until ready for installation.
- Carefully inspect all packing materials to prevent the loss of accessories, mounting hardware, spare parts or instructions.
- Do not discard packing materials until unit is assembled and start up is complete.

The Hygeaire® Model LIND30-EVO fixture includes:
- 1 - Model LIND30-EVO single lamp fixture
- 1 - STER-L-RAY® Germicidal Ultraviolet Lamp
- 1 - Operating Instructions
INSTALLATION

**Fixture Placement**

- The *Hygeaire®* fixture is recommended for use in rooms with good ventilation, with a ceiling height of 9 feet or more and where occupants remain for prolonged periods.
- Access to the room does not need to be controlled while the fixture is operating.
- The louver panels of the *Hygeaire®* fixture protects room occupants from ultraviolet exposure, by directing germicidal ultraviolet radiation into the upper areas of the room.
- Any plans for the installation of the *Hygeaire®* fixtures, should take into account the reflectance of the ceiling. Some finishes may have reflectances that are objectionably high, making exposure of more than a few hours unsafe. If any help is needed in determining the reflectance of a surface, please contact the factory.
- Ultraviolet energy, produced by the germicidal lamp, can fade some colors and/or alter the surface of some materials especially those directly irradiated by the lamp. If any help is needed in determining the ultraviolet resistance of any material, please contact the factory.
- The *Hygeaire®* LIND30-EVO fixture is designed to mount horizontally, on a vertical surface or wall at a minimum height of 7 feet above the floor.

**Setup Instructions**

- The fixture is to be mounted on a plumb, vertical surface, at a minimum height of 7 feet above the floor. (To ensure fixture is mounted to a secure vertical surface, installation location must be able to safely support 20 pounds.)
- Remove thumbscrews and open fixture to expose interior lampholders and reflectors. *(Figure 1 Item 1)*
- Remove one mounting screw from each end of the reflector so that the reflector will be able to pivot toward the lampholder. *(Figure 1 Item 2)*
- Pivot reflectors, on remaining screws, to expose the rear mounting holes and 7/8-inch wire access hole. *(Figure 1 Item 3)*
- All wiring should conform to state and local electrical codes as well as the current National Electrical Code (NEC).
- After mounting and wiring, pivot reflectors back into place and replace mounting screws. Install lamp following the steps in “Lamp Installation, Replacement or Cleaning” in the “Maintenance” section.
- Close fixture and replace thumbscrews

**Ultraviolet Output Adjustment**

**IN ORDER TO PERFORM THIS TASK, BE SURE TO WEAR THE FOLLOWING SAFETY EQUIPMENT: SAFETY GLASSES OR A FACE SHIELD, AS WELL AS GLOVES.**

Use an ultraviolet meter (see “Zenith™ Ultraviolet Meter” in “Optional Accessories” section) and survey the room in which the *Hygeaire®* fixture is installed.

If after a survey of the occupied area of the room shows the germicidal ultraviolet radiant exposure of personnel is not within acceptable limits, the output of the *Hygeaire®* fixture **MUST** be adjusted. The *Surelite™* Electronic Variable Output Ballast in the *Hygeaire®* fixture controls STER-L-RAY® Germicidal Ultraviolet Lamp output. The remote potentiometer, used for output adjustment, is recessed in the base of the fixture. Access, to the potentiometer, is limited by a ½” ID plug which must be removed before any adjustments can be made.

1. Locate and remove protective plug. *(see Figure 2, Item 6 - Replacement parts - Model LIND30-EVO)*
2. Carefully insert a small flat bladed screwdriver, through the clearance hole in the fixture, into the slotted shaft of the potentiometer. Slowly turn the shaft until desired output is reached. Turning shaft clockwise increases output, while turning the shaft counterclockwise decreases output.
3. Replace protective plug.

**Precautions**

Immediately following initial installation of the *Hygeaire®* fixture, the occupied area, of the room, should be surveyed with the *Zenith™* Ultraviolet Meter, to ensure that the ultraviolet radiant exposure of personnel is within acceptable limits. Thereafter this procedure should be repeated whenever any maintenance is performed, including lamp changes or whenever maintenance or repairs are performed in the vicinity of the fixture. In addition, procedures should be adopted to ensure that the fixture is powered off whenever personnel are working above the 6-foot level. Personnel who work in and around the treated area should be briefed on the benefits and the precautions to be observed.
If there are any doubts or questions about the safety or the effectiveness of the installation, or if a sensitive ultraviolet meter is required, please contact the factory. (See “Zenith™ Ultraviolet Meter” in the “Optional Accessories” section.)
**MAINTENANCE**

> **CAUTION** Personal protection equipment, such as gloves; long sleeves with no gaps between cuffs and gloves, and ultraviolet resistant face shield, is **required** when entering the irradiated space, above 6 ½ feet from the floor, with the germicidal lamp operating.

> **WARNING** Always disconnect power to the fixture before performing any service or maintenance. The Hygeaire® is equipped with a safety interlock switch that will shut down the germicidal lamp when the louver panel is opened.

> **CAUTION** Do not override safety interlock switch. Operation of the fixture with the override of the interlock switch and louver panel open will expose personnel to direct or strongly reflected germicidal ultraviolet rays. Germicidal ultraviolet rays are harmful to the eyes and skin.

- The Hygeaire® is designed to operate with a minimal amount of maintenance. Occasional ultraviolet measurements **MUST** be made to ensure that germicidal ultraviolet intensities in the treated areas remain within the allowable exposure limits and above minimum levels.

- A regular cycle of cleaning the **STER-L-RAY®** Germicidal Lamp and interior reflectors **MUST** be established based on visual inspection and experience. The frequency of cleaning will vary with the conditions surrounding each installation. It is recommended that the **STER-L-RAY®** Germicidal Lamp and interior reflectors be cleaned at least once every three (3) months.

- The **STER-L-RAY®** Germicidal Ultraviolet Lamp used in the Hygeaire® fixture have a manufacturer’s rated average effective life of 10,000 hours. Lamp may operate longer than rated effective life, but the reduction in ultraviolet output will make it impractical to use past the manufacturer’s rated life. For maximum efficiency lamp replacement is recommended every 10,000 hours of operation or about one (1) year of continuous use.

### Lamp Installation, Replacement or Cleaning

> **WARNING** Always disconnect power to the unit before performing any service or maintenance.

> **CAUTION** Ultraviolet lamp is easily damaged and may cause injury if broken. Exercise care when handling.

1. Shut down power to the fixture, and disconnect fixture from utility power source.
2. Open the louver panel, by removing the two (2) thumbscrews.
3. To remove **STER-L-RAY®** lamp, push the lamp to compress the spring-loaded lampholder. When the **STER-L-RAY®** lamp contact/pin clears the lampholder, angle the lamp away from fixture and pull out.
4. Moisten a clean, lint-free cloth with denatured alcohol and wipe down the outer surface of the lamp.
5. When **STER-L-RAY®** lamp has been removed and cleaned, then safely set aside, remove any loose dust or dirt from the interior of the fixture with a soft dry cloth, or vacuum. The reflector of the Hygeaire® is constructed from specular aluminum, a highly reflective mirror like material, used to maximize ultraviolet intensity.
6. To remove any dust, dirt, fingerprints, smears, etc, from the outer surfaces of the reflector, moisten a clean, lint-free cloth with denatured alcohol and wipe down the reflector. Buff out any streaks, left from the cleaning, using a soft dry cloth.
7. Install lamp, push the lamp to compress the spring-loaded lampholder. When the lamp contact/pin clears the lampholder, line up the contact pin on the end of the lamp with the hole in the center of the lampholder and release the lamp to allow the contact pin to seat.
8. Verify that lamp is properly seated.
9. Close fixture and replace thumbscrews.
10. Reconnect fixture to utility power, and restart fixture.

> **WARNING** Avoid exposure to direct or reflected germicidal ultraviolet rays. Germicidal ultraviolet rays are harmful to the eyes and skin.

11. Verify operation by viewing lamp, use of personal protection equipment is required. If the fixture is not operating properly, go to the “Troubleshooting” section.
**Breakage**

⚠️ **CAUTION** Broken Quartz is SHARP.

Wear protective gloves when handling broken ultraviolet lamp(s). In the event of breakage, **DO NOT** use a household vacuum cleaner to pick up fragments of the lamp. Sweep up debris into a plastic bag and dispose of properly.

**Disposal of Mercury Added Lamps**

Germicidal ultraviolet lamps, like standard fluorescent lamps contain small amounts of mercury. Mercury added lamps should not be placed in the trash. Dispose of properly. For further information regarding the disposal and recycling of lamps containing mercury, along with Federal and State requirements visit LampRecycle.org. For more information on **STER-L-RAY®** Germicidal Ultraviolet Lamps, visit Ultraviolet.com or BuyUltraviolet.com.

**Troubleshooting**

⚠️ **WARNING** Always disconnect power to the unit before performing any service or maintenance.

⚠️ **CAUTION** Use personal protection equipment, such long sleeves with no gaps between cuffs and gloves, and ultraviolet resistant face shield, if troubleshooting Hygeaire®.

**IMPORTANT:** This unit is to be serviced ONLY by qualified, and appropriately trained and/or licensed personnel.

**OPTIONAL ACCESSORIES**

1. **Zenith™ Ultraviolet Meter:** Part No. 30-0081-R is the recommended meter for this application. This sensitive, hand-held, ultraviolet meter that can be used to:
   - Survey ultraviolet room air sanitizer installations to ensure that the germicidal ultraviolet radiant exposure, of personnel within the treated area, is within acceptable limits. The Zenith™ Ultraviolet Meter provides accurate and easy-to-read levels of intensity that may be interpreted by anyone - not just engineers.
   - Check the intensity of aging ultraviolet lamps.

2. **Promate™ Safety Glasses:** Safety eyewear **MUST** be used as general-purpose safety protection and for additional shielding from ultraviolet rays

3. **Promate™ Face Shield:** Lightweight visor with adjustable headgear provides eye and face protection from germicidal ultraviolet rays

User Assistance

Atlantic Ultraviolet Corporation® makes every effort to ensure that the Hygeaire® Indirect Germicidal Ultraviolet Air Disinfection Fixtures are products of superior quality and workmanship. This manual describes the installation, operation and maintenance of the Hygeaire® Indirect Germicidal Ultraviolet Air Disinfection Fixture.

Patent Notice

No attempt has been made to determine the patent status of applications illustrated or described in this publication. Inclusion in this publication of any design or method of use, which may be patented, is not to be construed as promoting or sanctioning unauthorized use.

Warranty & Product Registration

We warrant this product to the original owner to be free from defects in material and workmanship when installed in accordance with Atlantic Ultraviolet Corporation® specifications for a period of time as follows:

UV Water Purifier Chambers – Type 316 stainless steel chambers will have a Twelve (12) year Limited Warranty on the stainless steel chamber, from the date of original purchase while the Type 304 stainless steel chambers will have a Six (6) year Limited Warranty on the stainless steel chamber.

UV Air Disinfection Housing – Three (3) year Limited Warranty on the metal housing, from the date of original purchase.

Ballast – Three (3) year Limited Warranty, from the date of original purchase.

UV lamps and Other parts – One (1) year Limited Warranty from the date of original purchase.

Within the warranty period we shall repair or replace such products, which are returned to us with shipping charges prepaid and which are determined by us to be defective. This warranty will not apply to any product, which has been subjected to misuse, negligence or accident; or misapplied; or modified; or repaired by unauthorized person; or improperly installed. Warranty will be null and void if any of the product’s original labels are removed. This Limited warranty excludes the cost of labor.

The Buyer shall inspect the product promptly after receipt and shall notify us at our main office in writing of claims, including claims of breach of warranty, within thirty (30) days after the Buyer discovers or should have discovered the facts upon which the claim is based. Failure of the Buyer to give written notice of a claim within the time period shall be deemed to be a waiver of such claim.

The provisions of the above warranty are our sole obligation and exclude all other remedies or warranties, expressed or implied, including warranties of merchantability and fitness for a particular purpose, whether or not purposes or specifications are described herein. We further disclaim any responsibility whatsoever to the customer, or to any person for injury to person, damage to, or loss of property or value caused by any product which has been subjected to misuse, negligence, accident; or modified or repaired by unauthorized persons; or improperly installed.

Under no circumstances shall the Company be liable for any incidental, consequential or special damages; losses or expenses arising from the contract for this product, or in connection with the use of, or inability to use, our product for any purpose whatsoever.

Be sure to register your product and validate purchase within 30 days — registration is simple and will take less than 2 minutes to do.

NOTE – failure to register your purchase may jeopardize warranty.

Go to Ultraviolet.com and scroll down to the bottom of the page, under “Trust” click the “Warranty Registration Form”, complete and click “Submit”. Or click on “Warranty Registration PDF” to download the warranty registration card as a PDF, complete and mail to us at 375 Marcus Boulevard, Hauppauge, NY 11788, or simply fax to 631-273-0771. If you prefer to register by phone, please call 631-273-0500 and our customer service staff will be glad to assist you.

For your convenience, record the following information below. The model and serial number can be found on a label located on the Hygeaire® Indirect Germicidal Ultraviolet Air Disinfection Fixture. Keep this manual, along with proof of purchase, handy when contacting our offices.
